DIRECTIONS: Solve the word problem. Use a model to help you solve the problem.

1) Holly needs 380 kg of pebbles for her garden. She only has 163 kg of pebbles. How much more pebbles does she still need?

2) A brick has a mass of 765 g. It is 248 g lighter than a cement block. How heavy is the cement block?

3) Peter bought 850 g of sugar. He placed 647 g in a jar and the rest he used in making iced tea.

   a. How many g of sugar was used to make the iced tea?

   b. How many more sugar was placed in the jar than used to make the iced tea?
