Topic: Math – Properties of Addition

Contributor : RFAquino

DIRECTIONS: Fill in the missing number or symbol to make the equation correct. Then identify the property used. Write Commutative Property of Addition, Associative Property of Addition or Identity Property of Addition.

1) $(97 + 28) + 5 = \underline{97} + (28 + 5)$

Associative Property of Addition

2) $\underline{0} + \begin{array}{c} \star \star \star \star \\ \star \star \star \star \end{array} = \begin{array}{c} \star \star \star \star \\ \star \star \star \star \end{array}$

Identity Property of Addition

3) $25 + \underline{75} = 75 + 25$

Commutative Property of Addition

4) $XXIII + (IV + XX) = (\underline{XXIII} + IV) + XX$

Associative Property of Addition

5) $\underline{99} + 1 + 1000 = 1 + 99 + 1000$

Commutative Property of Addition

6) $(45 + 25) + \underline{0}$ IS EQUAL TO 70

Identity Property of Addition

7) $\underline{XIII} + IV + XV = IV + XIII + XV$

Commutative Property of Addition

8) If $(300 + 150) + 50 = \underline{500}$, then $300 + (150 + 500) = 500$

Associative Property of Addition

9) $30\ 000 + 20\ 000 + 5\ 000 = 5\ 000 + 20\ 000 + \underline{30\ 000}$

Commutative Property of Addition

10) $2\ \text{thousands} + 0 = \underline{2\ 000}$

Identity Property of Addition
