

- **DIRECTIONS:** Read each problem. Write the equation & solve using long division. Label your answer.
 - 1) Betty wants to share the 78 cookies that she baked to her 8 classmates. If the cookies are distributed equally to her classmates, how many cookies will each classmate get? How many will be left over for Betty to have?

2) SS Fruit Company has to deliver 2453 apples. The apples will be packed into a fruit basket. Each basket can only hold 5 apples. How many baskets will be filled? How many apples will be left over?

3) Bart has to put 364 bottles in boxes. Each box can hold eight bottles. How many boxes will be filled with bottles? Will there be a box that will not be full?
