

Name : _____

Topic: Math – Addition and Subtraction of Dissimilar Fractions

DIRECTIONS: Find the equivalent fractions then solve for the sum. Write the fraction in its simplest form.

1) $\frac{4}{5} + \frac{4}{10} =$

2) $\frac{1}{6} + \frac{2}{3} =$

3) $\frac{2}{2} + \frac{3}{8} =$

4) $\frac{3}{15} + \frac{3}{5} =$

5) $\frac{1}{3} + \frac{7}{12} =$

DIRECTIONS: Find the equivalent fractions then solve for the difference. Write the fraction in its simplest form.

1) $\frac{3}{10} - \frac{1}{6} =$

2) $\frac{6}{12} - \frac{2}{3} =$

3) $\frac{4}{8} - \frac{3}{6} =$

4) $\frac{3}{4} - \frac{5}{8} =$

5) $\frac{2}{6} - \frac{3}{9} =$

DIRECTIONS: Solve each word problem.

1. Aunt May jogged $\frac{3}{8}$ of an hour in the village. Then Aunt Betty jogged for $\frac{2}{6}$ of an hour. How long did their jogging exercise take?

2. Gina had 1 meter of ribbon. If she used $\frac{6}{7}$ meter of the ribbon to make a bow, how much ribbon did she have left?
