Topic: Math – Estimation (Roundinf Off to The Nearest Ten or Hundred)

**DIRECTIONS:** Solve for the estimated sum, difference, product or quotient by filling out the blanks for each number.

A)  $268 + 75 \approx \underline{\quad} + \underline{\quad}$   
 $\approx \underline{\quad}$

B)  $842 - 67 \approx \underline{\quad} - \underline{\quad}$   
 $\approx \underline{\quad}$

C)  $88 \times 9 \approx \underline{\quad} \times 9$   
 $\approx \underline{\quad}$

D)  $1\,770 \div 6 \approx \underline{\quad} \div 6$   
 $\approx \underline{\quad}$

E)  $8\,637 - 541 \approx \underline{\quad} - \underline{\quad}$   
 $\approx \underline{\quad}$

**DIRECTIONS:** Answer the following.

Vince has Php 5 000. He went to the gift shop to buy Christmas presents for his sisters. Round off the value of each item to the nearest hundred to estimate the total cost.

Bag = Php 2,386

Scarf = Php 842

Wallet = Php 1 275

Sandals = Php 3 230

A) What is the estimated cost of all the items? \_\_\_\_\_

B) Does Vince have enough money to pay for all the items? \_\_\_\_\_
