

Name : \_\_\_\_\_

Topic: Science – The Digestive System

**Directions:** Write True if the sentence is correct and False if it is not.

- \_\_\_\_\_ 1. Digestion is the process of breaking down food into simple substances called digestives.
- \_\_\_\_\_ 2. Our digestive system helps break down the food that we eat into nutrients that can be absorbed by our blood.
- \_\_\_\_\_ 3. The food that we eat is first broken down in the mouth.
- \_\_\_\_\_ 4. Molars are our teeth in the front of our mouth.
- \_\_\_\_\_ 5. From the mouth, the food that has been cut into smaller piece by our mouth is pushed down through our esophagus.
- \_\_\_\_\_ 6. By the time the food gets in our stomach, the food is already completely digested and the simple substances are passed through the stomach walls.
- \_\_\_\_\_ 7. The small intestine is where the undigested food enters.
- \_\_\_\_\_ 8. At the end of the large intestines is the rectum.
- \_\_\_\_\_ 9. The waste or faeces that is left by the digestive system is passed out from our body through the anus.
- \_\_\_\_\_ 10. In this process of digestions, body parts work separately and do not depend on each other.

**Directions:** Name the organ parts that are part of our digestive system. Write them on the blank.
