DIRECTIONS: Write the letter of the correct answer on the blank.

- _____ 1. Evaporation is the change of state of water
- A. From solid to gas state
 - B. From gas to a solid state
 - C. From liquid to gas state
- _____ 2. Clouds are formed by
- A. Cold air rising
 - B. Hot air rising
 - C. Water vapor condensing
- _____ 3. Condensation is the change of state of water
- A. From gas to liquid state
 - B. Gas to solid state
 - C. Liquid to gas state
- _____ 4. Which statement is false?
- A. Evaporation only happens when water temperature reaches 100°C
 - B. Condensation is the opposite process of evaporation
 - C. The rate of evaporation depends on wind, heat and surface area
- _____ 5. The continuous movement of water from the surface of the earth into the air and back to the surface is called
- A. Evaporation
 - B. Life cycle of the world
 - C. Water Cycle
- _____ 6. Which statement is not true?
- A. If the weather is cold enough, the water droplets will freeze to form snow, sleet or hail.
 - B. Heat from the sun causes water to condense
 - C. Plants and animals also give off water vapour
- _____ 7. Which of the following shows the process of evaporation?
- A. Droplets of water on the bathroom mirror after you shower
 - B. Water puddle disappearing after the rain
 - C. Droplets of water on the inside cover of a hot packed meal
- _____ 8. The water used many centuries ago is the same as what we use now.
- A. True
 - B. False
 - C. Neither
